A Simple Drawing Tool is a free Bookmap add-on that draws colored Buyers and Sellers zones on your chart with hotkeys — point at a price, press a key, done.

## Install

- 1 Download the jar from [sdes.dev](https://sdes.dev) (free tools section).
- 2 In Bookmap: Settings → Configure add-ons → Add, pick the downloaded jar, then enable it on your instrument.
- 3 Settings → Keyboard shortcuts → Add-ons → A Simple Drawing Tool and bind the three actions below. NumPad 7 / 8 / 9 work well, but any keys you like are fine — the tool does not hard-code specific keys.

## The three hotkeys

Action	What it does
Draw Buyers zone	Drops a green Buyers zone at the price under your cursor.
Draw Sellers zone	Drops a red Sellers zone at the price under your cursor.
Delete nearest zone	Removes the zone closest to your cursor. (A delete-last action also exists if you prefer an undo style.)

## How to use it

- Point, press, drawn. Move your mouse to a price on the chart and press your Buyers or Sellers key. The zone starts at the cursor price and extends to the right.
- Move a zone by dragging its middle; resize it by dragging its top or bottom edge (the edge highlights when you are on it).
- Delete by pointing at a zone and pressing your delete-nearest key.

### The zones window

A small floating list of every zone you have drawn. Remove any one with its , or clear them all with Delete all. Reopen it from the add-on settings or with the show-window hotkey; the gear opens all settings.

### Settings worth knowing

- Zone sizing — “Fixed pixels” keeps the same on-screen thickness at any zoom (default); “Fixed ticks” is a true price range that scales with the chart.
- Zone colors, transparency, and the white outline are all adjustable.

Zones save automatically per instrument and return when you restart Bookmap.

## Free, as-is

Free to use, as-is, with no warranty of any kind. No license key, no account, no sign-up. © SDES, all rights reserved.
